

## How To Use Botanical Animal Flower Essences

Shake bottle well before using. Essences are most effective when applied directly in the mouth, in drinking water or on a hard treat. Use in your animal's daily care program (1 to 3 times daily), or use as a training or behavior adjunct (1 hour before needed). Safe to use during competition.

### ORAL

Place drops in the animal's mouth. Rinse dropper thoroughly if it contacts the mouth.

Cats and small animals: 4-8 drops per use

Dogs and medium animals: 6-10 drops per use

Horses and large animals: 1/4 - 1/3 eyedropper per use

### WATER

Double the dose recommended for oral usage. Add directly to animal's water bowl or bucket. Change water daily for best results. Replenish the essences with each water change.

### AS A MIST

Add 15 drops to 8 oz of purified or spring water in a spray bottle (preferable with atomizer spray). Spray directly into the air, in and around the animal's nose, mouth, ears or paws. Spray on their favorite toys, bedding and blankets.

### FOOD

Add recommended amount (same as oral) to your animal's favorite treat — use on treats that will not quickly absorb the value of the essences, like carrots or apples. The least effective way to use the essences is mixed in their food.

*Note: The rhythmic use of the remedies aids in the strength of their actions. The potency is increased by using them on a more frequent and consistent basis, not by using more drops at a time.*

## Shared Success Stories...

*I have five male Jack Russell Terriers. One dog started having fights, attacked my other dogs leaving three puncture wounds. The Devil Be Gone is a godsend and has relieved a lot of tension in the house. He is a completely changed dog — a playful, loving dog who hasn't had a fight since we've used Devil Be Gone.*

JANICE IRVING, EXERCISE GIRL, PHILADELPHIA PARK, BENSALEM, PA

*Not long ago I brought a young, unseasoned horse to a horse fair. The crowds, music, new smells and unfamiliar activity began to panic her. Cheryl, my instruction assistant, spotted the Equilite Booth and went to investigate. Mellow Out was recommended to us. Just a few drops on the mare's tongue and in about 20 minutes she began calming down! We were really impressed.*

SHARON CAMARILLO, BARREL RACING CLINICIAN AND INSTRUCTOR  
LOCKEFORD, CA

*Tristan, my Rottweiler male, was having trouble showing on Friday and Saturday. We went to Ronni Yaskin who told us Tristan needed the In Training essence. IT WORKED! On Sunday he not only showed beautifully, but won a 4-point MAJOR to finish.*

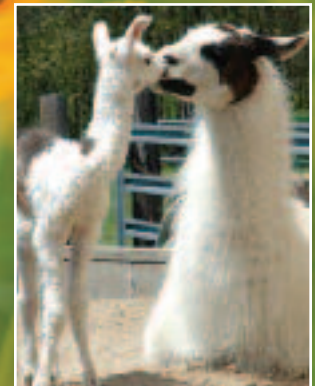

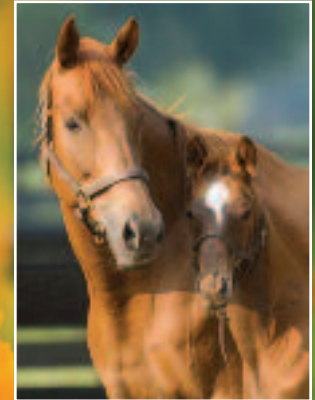

DORRIE ZIMMERMAN

*The Angel of Mercy is great stuff! I have noticed a big difference with our rescued dog and have been really surprised at the change in one of our cats. She is very sweet and has always been a very shy and private cat. Recently, however, she became very outgoing and now struts through the house and demands attention from everyone who visits. The only change in her life was the Angel of Mercy.*

LISA VON GONTARD, THE HORSE SOURCE LLC

## What Are Flower Essences?

Animals are continually challenged trying to live in our world, according to our rules. The stresses can be rooted in the emotional more than physical. Dr. Edward Bach realized the emotional factor behind physical imbalances and began to explore the plant world for some answers back in the early 1900s. Flower Essences bridge the gap between the two aspects of health. Today they are a common adjunct to conventional protocols in the pursuit of wellness for our animals.

Dr. Edward Bach, a famous English physician and trained bacteriologist was of the belief that diseases of the body are the result of negativity and imbalances directly attached to the inner soul, and that flower essences act to balance that emotional and spiritual energy within. Flower essences essentially act as a catalyst to cause healing.

Flower essences are liquid plant preparations that are made by infusing the fresh flower blossom under very specific conditions to create a potentized flower extract. Remarkably, the original 38 remedies developed by Dr. Bach are all still in existence today.

For more than 15 years, Equilite has been the leader in creating flower essence blends to address the specific needs of the animals we so love and enjoy. The specialized line of essence blends work synergistically to address the common situations that affect all our animals, at one time or another throughout their lives. Trauma, stress, abandonment, loss of a loved one, aggression, and insecurity are just some of the conditions that Equilite's line of Botanical Animal Flower Essences are designed to address.

Try an essence today, and begin a renewed and healthful relationship with your pet. *Enjoy!*

Stacey Small

*Since Flower Essences are based upon vibrational energies, they have no direct impact upon the body's biochemistry. They are non-habit forming, non-toxic remedies. There are no contraindications to any healing modalities or drug protocols. Flower Essences are safe to use during competition.*

**Available In** 1 ounce/30 ml. bottle  
2 ounces/60 ml. bottle  
4 ounces/120 ml. bottle

## Botanical Animal Flower Essences are issue specific, not animal specific. Mix and match!

### Angel of Mercy®

When there is extreme neglect and physical abuse present. Addresses issues of trauma, shock, fear, devastation, low self-esteem, feeling unsafe and insecure, or unloved and unwanted. **For any animal that has ever been rescued from a shelter or with an unknown history!**

### Clear Thinking™

Helps animals that are spaced-out, unfocused, easily distracted and overwhelmed by external stimuli. Great for those that do not pay attention or are unable to concentrate for any length of time. Helps to increase memory retention while improving the animal's capacity to learn new things.

### CrisEase®

To the rescue. When your animals experience any sort of accident or traumatic event, the emotional scars can be difficult for them to get past. Use whenever there is a shocking situation that over faces your animal, leaving them panicked, shaky, or off-balance. Great for emergencies as well as pre- and post-surgical situations. Helps resolve the crisis. Brings a greater sense of peacefulness.

### Devil Be Gone®

Deals with the willful, overly aggressive, hostile, stubborn, moody, rebellious, and cantankerous behavior that is considered dangerous. Addresses biting, snapping, bucking, rearing, and unprovoked attacks on other animals or people. Effective on animals that are intent on causing harm to themselves, other animals or people. **Try this before giving up on them!**

### Easy Does It™

For incidents of obsessive, destructive or disruptive behavior to property. Includes chewing of household items, urinating on furniture when left alone, demanding exclusive attention at all times, and constant whining or crying. Helps address frustration, loneliness, jealousy, over-protectiveness, boredom, and feeling victimized.

### Ego Builder™

Helps those animals that experience a lack of self-confidence and are afraid to face new situations. Excellent for any animal that seems reluctant or unwilling to meet the challenges or training expected of them (i.e., entering a ring, crossing water, jump hurdles, etc.) For the shy, timid, fearful, withdrawn, apathetic, or uncertain ones. **Give them a new sense of confidence and self-esteem.**

### Independence™

Eases animals' separation anxiety when being removed from their owner, mother or herd members. Addresses issues of abandonment, rejection, and worthlessness. Great to use when you go out of town or when an animal is weaned from the herd. Allows them to stand on their own without fear or anxiety.

### In Training™

Improves the animal's patience, focus, tolerance, and releases resistance. They become accepting of things they do not understand or tasks they do not want to do. Establishes a one-on-one bond with the trainer. **Helps them to work with you — not against you.**

### Life's Changes™

For facing drastic changes like the loss of a loved one or being moved to a new home. Resolves issues of resentment, intolerance, alienation, isolation, jealousy, feelings of sadness, heartache and depression. Re-socializes rescued animals. **Brings harmony and happiness to your home and family.**

### Mellow Out®

Helps to calm the nervous or jittery animals that may be moody, irritable or on edge all the time. For overly anxious and anticipatory animals that tend to lose control easily. Great to use prior to competition, thunderstorms, or firework displays. **Never leave home without it.**

### Obsess Less™

Calms the tendency towards obsessive-compulsive behavior. For incidents of self-destruction, self-mutilation, cribbing, chewing, licking, scratching, or plucking of feathers without cause. Addresses issues of self-loathing, frustration, boredom and feeling unclear. For when obsessive and repetitive behavior loses its original intent and becomes a habit.

### Safe Journey™

For courage to face trailering and traveling issues. Addresses nervousness, hysteria, anxiety, fear of confined spaces and motion sickness during travel. Instills a feeling of safety and security and helps to release attachments to those left behind. **Make traveling easier on them and you!**
